

SirionOne CLM and Adobe Sign Integration

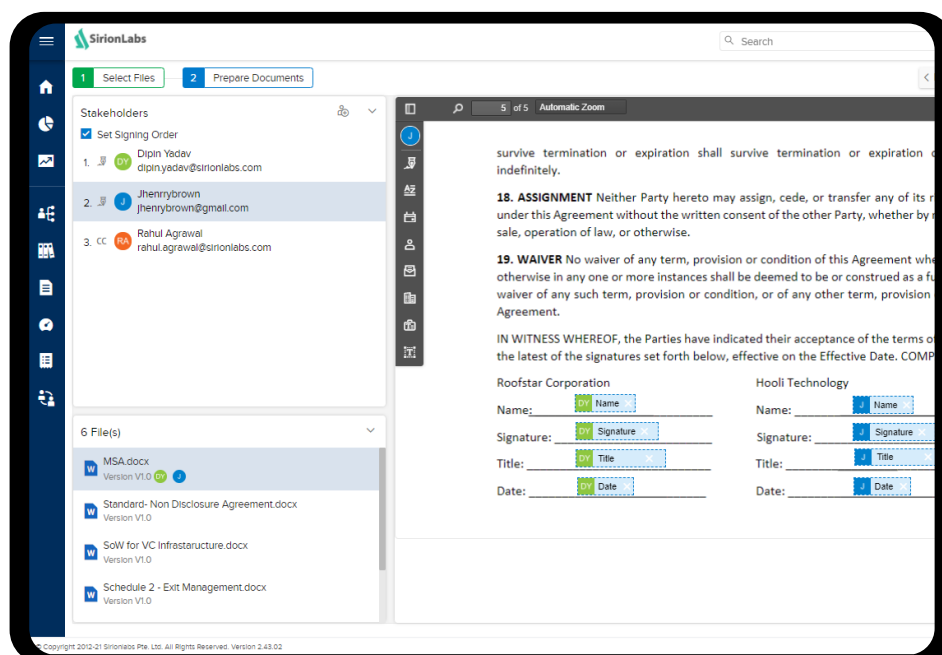

The volume and velocity of business squarely rests on how fast you can close and sign new deals, but that's where a key bottleneck has existed for quite some time. Traditional modes of signing a new contract demands that you print out the agreement, take it around from stakeholder to stakeholder, and have them manually sign it. Then there is the additional hurdle of repeating that process with your counterparty to finally close the deal. Delays can affect delivery timelines and even reintroduce risks at the final stages of execution.

Signature can be a particularly frustrating stage of the contracting process, especially if you have already digitized the actual authoring and negotiation processes.

SirionOne-Adobe Sign integration has been developed to specifically resolve this issue and offers customers a seamless e-signature experience that is built into their CLM program.

FEATURES

- Add internal and external stakeholders to electronically sign documents, anytime, anywhere.
- Set assigning order for signature (both sequential and parallel).
- Insert placeholders for signatures, dates, designations, and more within a contract.
- Receive real-time e-signature status updates within the system.
- Send automatic email alerts to signatories whenever a document is assigned and enable them to navigate to the document with a single click.
- Define access control parameters to ensure that only the right signatories with the right set of permissions can view specific documents.
- Create templates to predefine signatories, placeholders, signing order, and more.
- Automatically fetch certificates of completion/audit reports from e-signature tools and sync it to SirionOne.
- Auto sync executed document to SirionOne's repository from Adobe Sign.

ABOUT ADOBE SIGN

Adobe Sign, an Adobe Document Cloud solution is a cloud-based, enterprise-class e-signature service that lets you replace paper and ink signature processes with fully automated electronic signature workflows. With it, you can easily send, sign, track, and manage signature processes using a browser or mobile device. And you can use turnkey integrations and APIs to include e-signature workflows in your enterprise apps and systems of record.

ABOUT SIRIONLABS

SirionLabs, the SaaS leader in enterprise contract management (CLM), helps enterprises manage the complete contracting lifecycle on a single, easy-to-use platform. Sirion's AI-powered capabilities – from smart contract authoring to auto-contract extraction, advanced obligation management, and collaboration – enable enterprises to drive business velocity and outcomes, reduce risk and enhance revenue and savings in commercial engagements. SirionLabs is trusted by the world's most successful organizations to manage 3.5+ million contracts worth over \$300 billion across 100+ countries.

BENEFITS

Sign contracts, anytime-anywhere

Enable enterprise users to rapidly sign agreements from any device, wherever they are.

Enhance process efficiency

Create a 100% paperless process with minimal manual intervention requirements and overhead costs.

Strengthen data security

Leverage Adobe's best-in-class encryption technology to share sensitive contracts and other documents with signatories.

Maintain a comprehensive audit trail

Ensure that a complete log is maintained at the individual document level, which captures who signed the document and when.
